**FINEST *Woolen Merino* FABRICS**

# FANCY 360

## Herringbone

### Art. N° 50

Our first-rate woollen Merino fabrics are not only the first choice among renowned clothing brands and French couture houses with the highest quality standards. Our know-how of processing extra-fine Australian Merino wool and the special characteristics of this natural resource, which has been passed down for generations, is also the basis for our interior collection.

Since only extra-fine Australian Merino wool is processed and pure spring water from the surrounding Alps is used for fulling, this colourfully woven quality stands out from common herringbone patterns and feels particularly soft. Owing to its warm autumn colours and special binding type, the cloth has a particularly gentle look. Its lightness and special feel make Fancy 360, made from extra-fine Australian Merino wool, ideally suited for manufacturing curtains, cushions and headboards.

As a Woolmark® licence holder, Leichtfried guarantees the highest quality standards for woollen fabrics. The company has been a partner of Woolmark® for more than 50 years producing some of the finest woollen apparel and interior fabrics.

Leichtfried GmbH & Co. KG only trades with commercial customers. Please understand that we do not sell our fabrics to private customers.

---

**Founded in 1884, the Leichtfried woollen mill is specialized in the production of high-quality woollen cloth and loden fabrics, made primarily from extra-fine Australian Merino wool.**

The carefully selected raw materials have to pass through many different stages in a fully integrated production process - from spinning the fine woollen yarn and weaving the greige fabrics right through to the finished cloth. Meticulous quality assurance procedures throughout the entire production process ensure that our customers can always rely on first-class quality.

The combination of longstanding experience, consistent craftsmanship and modern technology has enabled the Leichtfried mill to look back on more than 130 years of the company's history. It remains the backbone behind the company's success today. Tradition and innovation coupled with an intuitive grasp of high quality fabrics means that the company can look forward to the future with confidence.
